

Stainless Steel A5 & A6

Standard shank versions
Standard head types
Open or closed end
1st and 2nd grips

superior corrosion protection

Cold formed TUBTARA® in high alloy austenitic stainless steel A5 and A6

● Material

Stainless steel A5 : 316 Ti – WNr 1.4571
Stainless steel A6 : 904L – WNr 1.4539

● Applications

- extremely demanding, chloride bearing applications where even A4 fasteners in stainless 316 offer insufficient corrosion protection
- A6 grade is also armoured against strong acid bearing environments
- civil engineering, tunnel infrastructures, ceiling panels in swimming pools etc.

● Important advantages

- improved corrosion protection, mainly thanks to considerable nickel and molybdenum content
- A6 guarantees increased protection against pitting and crevice corrosion, reaching a PRE (pitting resistance equivalent) value of 35 (compared to PRE 25 for stainless 316)

● Samples

Following samples available from stock: stainless A6 M6 UPO 30 – stainless A5 M8 UPO30 / M8 UPO 65 / M8 UFO 65 / M8 UKO 30 / M8 HUKO 30

Development of other dimensions upon request
